Practice Description

Management and manufacturing consultants who specialize in showing companies how to be the low cost, high quality, environmentally responsible, safety conscious producer in their industry. Extensive experience in developing and implementing management, quality, environmental and safety systems. Over two decades technical, management and consulting experience.

Practice Areas

Leadership and Management

Leadership and management practices, strategic issues, managing change, systems and procedures, managing without unions and developing internal resources are addressed using our proprietary and proven "Ten Essentials" process.

Quality, Environmental, Safety and Productivity

Systematic non-bureaucratic approach to continual improvement, ISO 9000, TS 16949, AS 9100, ISO 13485 and GMP Quality Management Systems. A practical and common sense approach to ISO 14001 and RC 14001 Environmental Management Systems and ANSI Z-10 and OHSAS 18001 EH&S Management Systems. We focus on reducing variability, eliminating waste and improving turn around times in all areas of the business. We define strategies for clients using our proprietary and proven "Ten Essentials" approach which has been developed by our firm and refined with scores of organizations.

Qualifications and Certifications

B.S. in Engineering; Certified Management Consultant; Professional Engineer; various continuing education certifications related to services provided for clients. **Author** of over three dozen nationally published articles; a **58 minute training video** with workbook "*Ten Essentials for Managers*;" and a **full length book**, ***Taking Care of the Basics, 101 Success Factors for Managers***.
